Terms and Conditions for the Dataset

Analysis of the Delta Between Costs and Revenues for GB Power Generation

1. Access Request Requirement

Although this dataset is openly available for anyone to use, all users are required to submit an access request before downloading or accessing the data.

This process exists solely to support reporting and impact monitoring, enabling the dataset creators and the UKERC Energy Data Centre to understand who is using the data and for what purposes.

2. Dataset Origin and Permitted Use

This dataset, *Analysis of the Delta Between Costs and Revenues for GB Power Generation*, is a derived dataset produced using underlying electricity market data obtained from Elexon through the P114 data collection.

The underlying P114 data is subject to the terms of the BSC Public Data Licence for P114 Data Items. Users of this derived dataset should ensure that any use of the underlying data remains consistent with those licence terms.

Subject to those conditions, users are free to:

- copy the dataset;
- publish, distribute and transmit the dataset;
- adapt, transform and build upon the dataset;
- incorporate the dataset into software, analytical tools, reports, research, and other outputs.

3. Attribution

When using the dataset in publications, reports, software, presentations, policy analyses, or any other output, users are requested to acknowledge the dataset creators and the UKERC Energy Data Centre.

Suggested Citation (Harvard Style)

Blyth, W. (2026) Analysis of the Delta Between Costs and Revenues for GB Power Generation. UKERC Energy Data Centre. Available at: [https://doi.org/10.82226/543.d.000004]

Where appropriate, users should also acknowledge the underlying P114 dataset and Elexon as the original source of the primary market data.

Suggested Acknowledgement

This work uses the dataset *Analysis of the Delta Between Costs and Revenues for GB Power Generation*, hosted by the UKERC Energy Data Centre. The analysis is derived in part from Elexon P114 half-hourly GB electricity grid data.

4. Data Quality and Disclaimer

This dataset is supplied "as is".

Neither the dataset creators nor the UKERC Energy Data Centre provide any warranty regarding:

- the completeness of the dataset;
- the accuracy of the dataset;
- the continued availability of the dataset;
- the suitability of the dataset for any particular purpose.

Users should consult the accompanying metadata and documentation for information regarding methodology, assumptions, data processing steps, and known limitations.

The creators accept no liability for any loss, damage, or consequences arising from the use of the dataset.

5. Sharing and Redistribution

The dataset may be:

- shared;
- redistributed;
- incorporated into software, tools, workflows, models, or other applications;
- modified, transformed, or extended;
- used to create further derivative works.

No additional permissions are required beyond the initial access request and compliance with any applicable underlying data licences.

6. Reporting of Use (Optional but Appreciated)

Users are encouraged to notify the dataset creators or the UKERC Energy Data Centre of any outputs based on the dataset, including:

- academic publications;
- conference presentations;
- policy reports;
- software or analytical tools;
- commercial or industrial applications;
- educational materials.

Information on dataset usage helps demonstrate impact and supports the continued provision of open energy data resources.

7. Underlying Data Licence

This dataset incorporates analysis derived from data originally provided by Elexon under the BSC Public Data Licence for P114 Data Items. Users should familiarise themselves with the terms of that licence where relevant to their intended use.
